**ABSTRACT**

Bronchial asthma is a condition in which a person's airways become inflamed, narrow, swell and produce extra mucous, which makes it difficult to breathe. Asthma can be minor or it can interfere with daily activities. Asthma is more common in female adults than male adults. It is a leading chronic disease in children. It is a major non-communicable disease, worldwide it is a major health problem for people of all age groups & Homoeopathy is one of the best mode of treatment for all types of diseases. Here I am going to share a case study that shows the efficacy of constitutional Homoeopathic medicine in the treatment and management of Bronchial Asthma.

**KEY WORDS**

Bronchial Asthma, Case Study, Homeopathic Treatment & Management.
