**ABSTRACT:**

Urticaria is a hypersensitivity reaction caused by either external or an internal cause. The signs and symptoms sometimes annoy the patient to a greater extent and leads to both mental and physical disturbance. Another aspect to be taken into consideration is that these symptoms will have effect on the psychic aspect of the patient. Since the manifestations are external, people are in a hurry to conceal the disease and hence go in for topical applications which take the disease further deep into the body. Skin diseases have been earnestly treated by Homoeopathic medications for a long time with good results. Applying the vital principles of Homoeopathy and holistic approach in skin diseases should not be considered as local diseases. The use of external application should be strictly avoided. These diseases should be regarded as the ones resulting from internal derangement of vital force and disharmony and it should be treated with internal medicine.

**KEYWORDS:** Efficacy, Homoeopathic Medicine, Urticaria.
