### **ABSTRACT:**

Children with attention-deficit/hyperactivity disorder (ADHD) have behavior problems that are so frequent and/or severe that they interfere with their ability to live normal lives. These children often have trouble getting along with siblings and other children at school, at home, and in other settings. Those who have trouble paying attention usually have trouble learning. Some have an impulsive nature and this may put them in actual physical danger.<sup>1</sup>

**Keywords:** ADHD, Homeopathic management, Homeopathic therapeutics
