ABSTRACT:

This study evaluates the clinical utility of the Modality Chapter in Dr. C. M. Boger's Synoptic Key of Materia Medica, specifically focusing on its effectiveness in acute prescribing. By analysing acute cases and comparing Boger's modality-centred approach with alternative repertorial techniques, the research demonstrates that these characteristic aggravations and ameliorations serve as reliable, rapid distinguishing factors for precise remedy selection. The findings conclude that the Modality Chapter significantly enhances a clinician's ability to individualize treatment in emergency situations, proving that Boger's methodology remains a highly successful and practical tool for both homeopathic students and experienced practitioners.

KEYWORDS:

Acute Cases, Causative modality, Time Modality
