### ABSTRACT:

Ectodermal Dysplasia is a rare inherited condition that affects one or more structures that originate from the ectoderm. This case report provides an insight into the features of ectodermal dysplasia and the early management of a child with Anhidrotic Ectodermal Dysplasia exhibiting anodontia with removable prosthesis, aiming to improve the function, aesthetics, and emotional well-being of the child.

**Keywords:** Ectodermal dysplasia, inherited condition, anodontia, prosthetic treatment.
