ABSTRACT

Orbital defects, in combination with intraoral maxillary defects, present unique challenges in terms of functional and aesthetic rehabilitation. These defects require a detailed plan for the prosthetic rehabilitation process, highlighting the prosthetic approach required to achieve successful outcomes. This case series presents a comprehensive analysis of two cases involving the management and outcomes of orbital prosthesis and combined orbital prosthesis with intraoral maxillary obturator.

Key words: Orbital prosthesis, Combined oral and orbital defects, Obturator, Mucor-mycosis, Maxillofacial prosthesis, Prosthetic rehabilitation.
