**ABSTRACT**

**Aim of the study:** To assess the opinion and perception of Dental Interns of Madhya Pradesh regarding joining a Finish School for enhancing their clinical skills after their graduation.

**Materials and Method:** A questionnaire was made and uploaded in the form of google form. The survey was performed electronically for about a month, from March 24, 2022 to April 24, 2022. The results were obtained in the form of pie charts and graphs.

**Result:** A total of 107 Interns who are almostly at the verge of starting a personal practice participated in the survey, out of which 90 percent of the people responded positively for joining a Finish School post their graduation to sharpen their skills and learn about the management of a private dental practice.

**Conclusion:** The finding of the survey suggests that fresh graduates today are more keen to enhance their knowledge, skills and have a proper idea of how to handle their clinical practice even before starting it so that they can have a more established practice individually. Also, students today are appreciating the idea of a school from a non-beneficial organisation from which they can learn efficiently and earn back their investment from the school.

**Keywords:** Dental Education, Dental Interns, Finish School, Madhya Pradesh
