### ABSTRACT

It can be challenging to create a visually-pleasing anterior composite. The anterior teeth are, essentially, the ones you see when you smile. For obvious reasons, people want perfectly-crafted replacements. To be successful, the clinician needs to understand proper shade selection and must be able to accurately replicate the natural luster of a tooth and the correct tooth shape. Of various system available in the market, most recent is direct composite template system which creates beautiful composite veneers with predictable shape and symmetry.

**KEYWORD :** Direct laminate veneer, Prefabricated template, Esthetic, composite.
