ABSTRACT:

Esthetics has become a matter of necessary concern to the dentist. Changing trends and treatments for dental disease have made it necessary to diversify dental services. Laminate veneer restorations have a unique position in today's dental practice. Today, Porcelain Laminates Veneers are mainly used to optimize tooth form and position, close diastema, replace discolored or unesthetic composite resin restorations, restore teeth with incisal abrasions or tooth erosion and mask or reduce tooth discolored. This article represents a case of midline diastema which was aesthetically corrected using laminate veneer.

KEY WORDS: midline diastema, porcelain laminate veneers, spot etching.
