### **ABSTRACT:**

Full mouth rehabilitation should restore a state of functional and biological efficiency in which teeth and their periodontal structures, masticatory muscles, and temporomandibular joint (TMJ) mechanisms all function together in synchronous harmony. This article is an overview of the various classification system used for full mouth rehabilitation patients which will help the clinician select an appropriate treatment plan for an individual case.

**KEYWORD:** Full Mouth Rehabilitation, Turner and Missirlian classification, Brecker's classification
