ABSTRACT

Development of new dosage forms without disturbing the basic principles of Ayurveda need an hour for the global acceptance. Lozenges are solid dosage form of medicament which are meant to be dissolve in mouth or pharynx, medicated lozenges are helps to increase retention time in the oral cavity which enhances bioavailability, reduce gastric irritation and bypass first pass metabolism. The drug delivery through the hard candy lozenges has an easy marketing advantage due to its attractive appearance and patient compliance, here an attempt was made to understand pharmaceutical study of hard candy lozenges in Ayurveda with examples.

KEYWORDS: Hard candy, Lozenges, *Talisadi* lozenges.
