ABSTRACT:

Simple Allergic Conjunctivitis is a non-infectious type of ocular surface disorder commonly encountered in the day-to-day practice, the signs and symptoms of which get usually triggered by any specific allergen with respect to each patient. Although a minor eye infection if left untreated it can sometimes worsen causing damage to cornea, lids and tear ducts. This paper aims to highlight Shigrupallava Arka Aschyotana treatment benefit in Simple Allergic Conjunctivitis on the basis of clinical observation on a patient. All the symptoms showed highly significant results. Hence it can be concluded that this medicine is very effective in patients of Simple Allergic Conjunctivitis.
