ABSTRACT

Kidney stone disease has been and still is, a disease, where many scientific studies are conducted to bringout the exact pathophysiology, driving forces and the risk factors associated with the disease. Many researches are being conducted in terms of treatment options –MET (Medical Expulsive Therapy) and other Endo urologic procedures. One of the earliest mentioning about the stone disease has been found in our Susrutha samhitha indicating the disease prevalence since time immemorial. Thorough knowledge and understanding the depth of the disease pathology in our classics can put insight to the students about how brilliantly Acharyas has explained things then. This article is a short review on Mootrashmari – Kidney stone disease.
