Comparing the Effectiveness of a Foam Brush with that of a Toothbrush

Dr. Sunaina Patil¹

Email Id: serviceheb@gmail.com

ABSTRACT:

Foam brushes had been used in the oral care of hospitalized patients for many years. However, no controlled examine in their efficacy has been conducted. A randomized crossover study, comparing the effectiveness of a foam brush with that of a toothbrush, was achieved. The gingival situation and presence of plaque inside the mouths of 34 volunteers had been accompanied. It was shown that a toothbrush shown better performance in controlling plaque and gingivitis.

KEY WORDS: plaque, brush, foam
